USAMA ATTIQ

LinkedIn | +92-321-8122180 | usamaattiq31@gmail.com | GitHub | Portfolio

I have 2 years of experience as a mobile app and website developer. I have developed scalable mobile applications and websites using React Native Expo and CLI, React.js, Next.js, Node.js, Express.Js for UI and backend and for database I have used MongoDB and MySQL. I am very passionate about writing clean code, optimizing performance, and contributing in Agile teams. Proven ability to build real-time apps, integrate APIs, and deliver engaging user experiences.

Skills

- **Technologies:** React Native | React Js | Next Js | TypeScript | Node Js | Express Js | MongoDB | MySql | JavaScript | Tailwind | HTML | CSS | WordPress
- **Tools:** VS Code | Android Studio | XCode | Postman | Swagger | Github

Experience

DeltaDots *Lahore , Pakistan*

Software Engineer **04/2024 - Present**

- Developed **cross-platform mobile applications** using **React Native CLI and Expo**, delivering seamless iOS and Android experiences.
- Implemented **native modules**, device features (camera, location, push notifications), and **React Navigation** for smooth user flows.
- Developed and maintained responsive, high-performance web applications using **React.js** and **Next.js.**
- Implemented **dynamic**, **reusable** components and interactive features to enhance user experience and application scalability.
- Integrated **RESTful APIs** and third-party services into React/Next.js applications, ensuring efficient data handling and secure interactions.
- Utilized **Redux** and **Context API** for effective state management, enabling predictable data flow and improved application maintainability.
- Collaborated closely with UI/UX designers to translate design mockups into pixel-perfect, **responsive** user interfaces.
- Optimized frontend performance through code splitting, lazy loading, and Next.js server-side rendering **(SSR)** techniques.
- Participated actively in **Agile** development processes including sprint planning, daily standups, code reviews, and retrospectives.

AdoraSoft *Lahore , Pakistan*

Software Engineer **06/2022 - 9/2022**

- Developed **full-stack web applications** using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, delivering scalable and high-performance solutions.
- Built and maintained **responsive front-end interfaces** with **React.js and Next.js**, implementing reusable components and interactive features to enhance user experience.
- Designed and implemented **RESTful APIs** and integrated **third-party services** with **Node.js/Express** for efficient data handling and secure interactions.
- Managed application state using **Redux and Context API**, ensuring predictable data flow and improved maintainability.
- Implemented **server-side rendering (SSR)** and performance optimizations, including code splitting and lazy loading, to improve web application performance.

- Integrated **MongoDB** for database management, designing schemas, and ensuring efficient query handling for CRUD

operations.
- Collaborated with **UI/UX designers** to translate design mockups into **pixel-perfect, responsive user interfaces**.
- Participated actively in **Agile development processes**, including sprint planning, daily standups, code reviews, and retrospectives.
- Deployed and maintained applications on **cloud platforms** and implemented best practices for **security, scalability, and performance**.

Projects Completed

- **VehicleVista App:** Developed a car inspection management application called **VehicleVista** both website and mobile application using **Next Js** and **React Native** use **Node js** as backend, **MongoDb** to store data and **Firebase** for image storage. The app allows users to log vehicle inspections, generate reports, and track vehicle history. I integrated **real-time maps** to display vehicle inspectors location and added **push notification features** for timely inspection updates.
- **E-commerce Platform:** Developed a secure and scalable e-commerce web application using **React.js** and **Node.js**. The platform included features like product management, user authentication, and payment integration. I focused on creating a responsive, easy-to-use interface with fast performance and smooth checkout experiences.
- **Flic.me App:** Worked on **Flic.me**, a social media application, where I developed multiple dashboards for the web platform using **Next.js**. This included the **main website dashboard**, **user dashboards**, **admin dashboards**, **influencer dashboards**, and **business dashboards**.
- **Food Shop Management System:** Developed a complete Food Shop Management System website using **Next.js**, **Node.js**, and **MongoDB**. I handled both the **frontend** and **backend** development, working on full **CRUD** operations for managing food items, orders, and customer records.
- **Postify App:** Developed a mobile application called **Postify** using **React Native (Expo)** for both Android and iOS platforms. The app allows users to post updates, share content, and view posts in real-time. I built the backend with **Node.js** and **MongoDB** to manage user data and app content, while **Firebase** was integrated for user authentication and media store.
- **Festa Event App:** Built a cross-platform mobile application using **React Native CLI**, focused on event organization and attendee management. Implemented features like **event creation, ticket booking, attendee check-ins, and push notifications**. Integrated **Node.js backend and MongoDB** for real-time event data handling and storage.
- **Bragtime App:** Developed a mobile application using **React Native Expo**, designed to enhance **social event sharing and engagement**. Added features like **user profiles, media sharing, live event feeds, and RSVP management**. Integrated **Node.js backend and MongoDB** to manage dynamic event content, with support for **real-time updates and push notifications**.
- **SWLP Website:** Developed a responsive, property-based website using **WordPress**, implementing **custom themes, property listing plugins (like Property Hive)**, and additional integrations to manage property data. Enhanced the site with **custom plugins, SEO optimization, and performance improvements** to increase user engagement and visibility.

Education:

Bachelor of Science in Computer Science (BSCS) (**University Of Central Punjab,** *Lahore*)
