Professional Summary

Full Stack Software Engineer with 3+ years of professional experience building and deploying scalable web and cross-platform mobile applications using React.js, Next.js, React Native, Node.js, Nest.js, Express.js, TypeScript, MongoDB, and PostgreSQL. Experienced in designing RESTful APIs, authentication and authorization systems, real-time features, third-party integrations, cloud services, and production deployments across web, Android, and iOS. Strong background in MERN/PERN development, database design, AWS, Firebase, CI/CD, and Agile development. Proven ability to deliver production-ready applications for logistics, transportation, CRM, e-commerce, and marketplace platforms. .

Technical Skills

Languages: JavaScript, TypeScript, Python
Frontend: React.js, Next.js, React Native, React Hooks, Redux Toolkit, Zustand, Context API, Tailwind CSS, Material UI, ShadCN UI, Responsive Web Design, HTML5, CSS3
Backend: Node.js, Nest.js, Express.js, REST APIs, JWT Authentication, Firebase Authentication, Whatsapp OTP Integration
Database: MongoDB, MySQL, PostgreSql
Cloud & Deployment: Firebase, Vercel, Render, AWS (EC2, S3, Amplify, SES, IAM) , Hostinger
Tools: Git, GitHub, Postman, Swagger, Jira, ClickUp, VS Code, Docker, Trello
AI Tools: Cursor, Claude Code, ChatGPT

Work Experience

Full Stack Software Engineer **04/2026 – Present**
SilverAxis *Lahore, Pakistan*
– Develop and maintain scalable web and cross-platform mobile applications using React.js, Next.js, React Native, Expo, TypeScript, and Node.js.
– Design and integrate RESTful APIs, backend services, databases, authentication, OTP, maps, location services, file uploads, and third-party integrations.
– Build production-ready applications using MongoDB, PostgreSQL, AWS S3, Firebase, and cloud services.
– Develop responsive web applications, admin dashboards, and management portals using React.js and Next.js.
– Collaborate with frontend, backend, QA, and product teams in Agile/Scrum environments.
– Manage Git workflows, code reviews, testing, CI/CD, release builds, versioning, and production deployments across web, Android, and iOS.
– Published and maintained mobile applications on the Google Play Store and Apple App Store, including release management and production deployments.

Software Engineer **04/2024 – 03/2026**
Deltadots *Lahore, Pakistan*
– Built scalable MERN Stack web applications with reusable, component-based architectures.
– Developed and maintained production-grade React Native mobile applications for Android and iOS.
– Developed backend APIs and services using Node.js, Express.js, and PostgreSQL/MongoDB.
– Integrated AWS S3, Firebase, payment gateways, geolocation, maps, camera, push notifications, and secure storage.
– Implemented real-time functionality including location tracking, live updates, notifications, and interactive maps.

– Contributed to code reviews, debugging, testing, CI/CD, and application deployments.

Web Developer **06/2023 – 02/2024**
AppSperro *Lahore, Pakistan*
– Developed web applications using MongoDB, Express.js, React.js, and Node.js.
– Developed backend APIs and server-side functionality using Node.js and Express.js.
– Debugged application issues, integrated APIs, and contributed to feature development.
– Used Git for version control and collaborated with developers throughout the development lifecycle.

Selected Projects

Mazad Al Safar – Transportation Platform | Android · iOS | *React Native, Node.js, PostgreSQL, Firebase, AWS*
– Cross-platform transportation app built featuring trip management, RFQ requests, real-time maps, push notifications, and multilingual support.

Smart Backload – Live Freight Marketplace | Android · iOS | *React Native, Nest.Js, PostgreSQL, Firebase, AWS*
– Logistics marketplace connecting available trucks with freight for return routes, featuring truck availability, RFQs, competitive bidding, intelligent load matching, and direct transporter-broker communication.

Buy Together – Group Procurement Platform | Android | *React Native, Node.js, PostgreSQL, Firebase, AWS*
– Group procurement app enable buyers to collectively purchase products in bulk, featuring group orders, RFQ Requests, supplier catalogs, bulk pricing, order tracking.

BuyTogether Portal | buytogether.ai | *React.js, Node.js, Express.js, MongoDB, PostgreSQL*
– Developed a production group procurement platform enabling buyers to create or join group purchases, access bulk pricing, and track orders from group formation to delivery.
– Built buyer and supplier workflows with product listings, group order management, OTP/MPIN authentication, responsive dashboards, and scalable RESTful APIs.

Flic | flic.me | *React.js, Node.js, Express.js, MongoDB, PostgreSQL*
– Developed a social networking platform with customizable profiles, digital Bundles, connections, broadcasts, analytics, and business-focused networking features.
– Implemented real-time networking workflows, privacy controls, Bluetooth-based Flic Nearby interactions, and Tap & Share functionality for seamless contact and content sharing.

SWLP Website | swlp.co.uk
– Responsive, property-based website using WordPress, implementing custom themes, property listing plugins (like Property Hive) and additional integrations to manage property data. Enhanced the site with custom plugins and SEO optimization.

Education

University of Central Punjab, Lahore
Bachelor of Science in Computer Science (BSCS)
